Name: Yasaswi   yasaswi10@outlook.com

UI Developer   **609.535.2616**

Professional Summary:

- Overall 2 years of experience in developing professional web applications which includes front-end designing and hand coding with solid proficiency in usability, web and client/server applications.

- Experience in designing User Interface (UI) applications and professional web applications using **HTML5, CSS3, JavaScript, jQuery, AJAX, JSON and XML**.

- Experience in designing the interface **UI/UX strategy, UI requirements, converting findings into UI designs**.

- Good experience in using the latest JavaScript framework **Angular2** and worked with all its various concepts like forms, services, custom directives, promises, observables and providers.

- Used **Angular 4** Reactive forms to implement complex forms and performed the validations using Form Builder.

- Extensive experience in building Single Page Applications (**SPA**) using frameworks like AngularJS and Custom **MVC frameworks.**

- The Document Object Model (**DOM**) is an application programming interface (API) for valid HTML and well-formed XML documents. It defines the logical structure of documents and the way a document is accessed and manipulated.

- Sound Understanding and good Experience of using the various **JavaScript** concepts like Prototypes, Closures, and Object-oriented features, Promises.

- Good experience in developing Responsive Web Design, **Cross Browser** issues handling and designing table-less layouts and Web Standards.

- Developed backend web services using **Node JS** and stored dependencies using NPM. Added user validations and user permissions by using the Node.js.

- Excellent experience in **Restful Web services, Big Web service development and consumption**.

- Experience in database design using PL/SQL to write Stored Procedures, Functions, Triggers and strong experience in writing complex queries, using **Oracle, DB2, SQL Server and MySQL**.

- Experience in developing web applications using **MVC architecture**.

- Hands on experience using the version control tools like **Git, SVN** and **TFS** and project management/ticketing tools like **JIRA**.

- Hands on expertise integrating Jenkins with GitHub private repo, build automation tool **Maven**.

- Familiar with popular browsers development and debugging tools/plugins for IE tester, Chrome Inspector, Firebug, Jasmine and Karma testing framework.

- Considerable experience with IDEs like **Eclipse, NetBeans, Brackets, Sublime, Notepad++, Microsoft Visual Studio**.
- Experience in all phase of SDLC like Requirement Analysis, Implementation and Maintenance, and experience with Agile and SCRUM.

Technical Skills:

UI Technologies.	L/HTML5, CSS/CSS3, Prime Ng, Bootstrap, AJAX, XML, JSON, Wire Framing, Adobe Photo shop.
Scripting Languages	JavaScript, jQuery, AngularJS, Angular2/4/5, TypeScript, Node.js, React.js, jQuery
Operating Systems	Windows, Mac
Methodologies	Agile, Waterfall
Project Management tools	enkins, JIRA, ALM

Professional Experience:

Client: ICS, IL   **May 2018 - Present**

Role: Angular5 Developer

Responsibilities:

- Worked in **Agile** methodology with daily SCRUM and actively participated in daily standups to discuss the progress of the application and was also involved in Sprint planning and retrospectives.
- Responsible for designing elegant User Interface by coding in **HTML5, CSS3, Bootstrap, Node.js and Angular5** to build **SPA Single Page Application**.
- Integrating the front-end UI to the backend using **MVC** framework.
- Responsible for creating UI using **WCAG 2.0** standards and meeting W3C standards.
- Extensively participated in **UI/UX** process for research, analysis, design, prototyping, testing and iterations.
- Implemented **Bootstrap** CSS in **Angular5** for developing rich and responsive UI.
- Experience working on Structural directives and Attribute directives in Angular5 using **TypeScript.**
- Experience in writing Components, Pipes and Services to separate concern and handle different situations by using **Angular5**.

- Used Service, @Input, @Output, @ViewChild, EventEmitter for components communication and using Directives to manage behavior.
- Highly used **Angular4/5 router** to build single page application to navigate through the different status and multiple modals.
- Used Angular by consuming **REST Web Services**, used Angular framework to build web-apps.
- Successfully performed REST APIs integrating using **XML and JSON**.
- Created design mock-ups and wireframes using **Adobe Photoshop CS4** and **Dreamweaver CS3.**
- Implemented inheritance properties using **SASS** for creating responsive style sheets.
- Used **PL/SQL** programming for interaction with RDMS to store customer and application related data.
- Debug the application using Firebug to traverse the documents and manipulated the Nodes using **DOM** and **DOM** Functions using **Firefox (Firebug)**.
- Used **JIRA** as a ticketing tool, bug tracking and issue tracking.

Environment: HTML 5, CSS3, Typescript, Angular 4/5, ES5/6, WCAG 2.0, Mongo DB 2.6, JavaScript, AJAX, CSS2/3, Jenkins, JSON, Adobe Photoshop, XML, Apache Tomcat v6.0, GIT and REST Web Service.

Client: All Tech Media, India   **June 2015 - Dec 2016**
Role: Jr UI Developer
Responsibilities:

- Designed and developed User Interface using **JSP, CSS, HTML and JavaScript**. Used **JavaScript DOM** manipulation and **JavaScript** event to generate the data result   in UI.
- Responsible for developing the UI pages using **HTML5, CSS3, JavaScript, AngularJS, JSON, jQuery, AJAX**.
- Experience in writing Components, Pipes and Services to separate concern and handle different situations by using **Angular2**.
- Strong Experience in dealing with CSS Concepts like CSS Background, CSS Layouts, CSS positioning, CSS text, CSS border, CSS margin, CSS padding, Pseudo classes, Pseudo elements, CSS Animations and CSS Box Model.
- Performed a lot of DOM manipulation using **native JS and jQuery** for loading and manipulating dynamic content on webpages.
- Adopted a **cross browser and cross platform** approach to make the website more versatile and Supportive.
- Managed application state using server and client-based State Management options.
- Developed Page layouts, Navigations and presented designs and concepts to the clients and the management to review.
- Developed **RESTful, SOAP web services** interface to Java-based runtime engine and account

- Responsible for checking cross browser compatibility and hence worked on different browsers like safari, Internet explorer, Firefox and Google chrome.
- Designed the table less web applications using CSS and with the help of tags as per W3C standards.
- Involved in writing application level code to interact with **APIs, Web Services using AJAX, JSON and XML**.
- Brief experience on implementing the Angular.js in creating animations based on CSS classes.
- Used Spring modules of DI/IOC, batch implementation and **Spring MVC**.
- Used **Spring XML** to configure dependency injection to do work independently.
- Generated **SQL** queries to interact with Oracle database using **JDBC**.
- Experience in maintaining a large number of files through version control.

  Environment: HTML, CSS, Angular2, JavaScript, JSON, JQuery, Bootstrap, Node.js, AJAX, Java, JSP, Eclipse, MySQL, and Apache Tomcat.
